Yamaha 70hp charging problem

Hi, I'd appreciate a bit of help on a small problem with a friends engine if any one would be so kind. He's got a 1998 yamaha 70hp 2 stroke outboard. The charging voltage starts at around 13-14 volts when the engine is started but then rises up to 17-18 volts after a few minutes and stays up there. I've checked the output with a meter and it's definitely up at 17 volts.
